ST. BHATEVARA [TEAM-29]
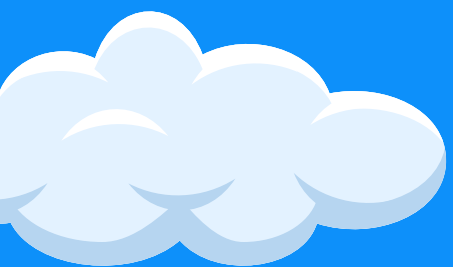

HOW THE SOLUTION ADDRESSES THE PROBLEM

- Digitalizing the process of approving applicaitons
- Shifting from excel to database.
- Partner NGOs will able to submit student profiles for additional committee member validation.
- Reports can be produced using the data and can be used to visualize the data.
- Information about former students is available to current students so they can expand their networks and seek advice in their fields.

KEY FEATURES
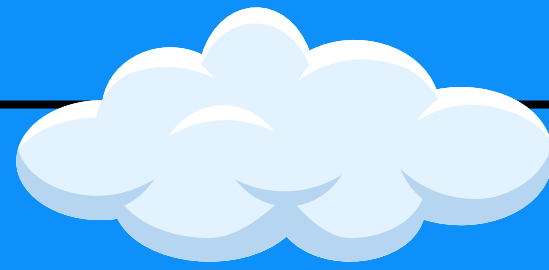

- Provides an interface between the three levels

  Partner NGO ⟶ Volunteer ⟶ Foundation

- Elimination of physical application form

- Easy monitoring of data analytics

- Virtualized personal interviews

- Enables interactions among the students and alumni

Our Objective

The St. Bhatevara Foundation ensures education extends beyond the 12th standard by aiding underprivileged students in accessing graduate-level education. Scholarships cover tuition, accommodation, and other expenses, removing economic barriers. Mentorship, career guidance, and extracurricular support foster holistic development. These efforts empower students, uplift communities, and reduce educational inequality, creating role models and fostering a more equitable society.

FUTURE ENHANCEMENTS

- Use a machine learning to know about the patter of the drop out students like :

  " Are they from a particular area ?"

- Use State statistics to identify the target students .
  For instance ,

  "The state that has the high/good child rate but low literacy rate "

- Can detect fake documents using comptuer vision technology.
